

On 12th October, some students from the local high school went to our school to present their Erasmus+ project. They presented it in English. We learnt about the aim of their project, their partners, the activities and the meetings they have already done. Then we presented our project as well. We talked about our partners, the scientific activities we have had and the European meeting in our school last year. After that, we asked lots of questions to know more about the project, and the school, asked advice on what to expect when you attend a meeting in Europe, how it is in a host family...

it was a pleasant and interesting moment.

We are looking forward to meeting them again.
